Revenue (Revenue) Department, December 1913, Nos. 54-62.

No. 147 (Rev. & Agri.—Rev.), dated Lahore, 17th December 1913.

From—The Hon'ble Mr. J. P. THOMPSON, I. C. S., Revenue Secretary to Government, Punjab,

To—The Junior Secretary to the Financial Commissioners, Punjab.

No. 62

I AM directed to acknowledge receipt of Mr. Dunnett's letter No. 878,\* dated 5th November 1913, enclosing copies of the Una Assessment Report and of the orders which Mr. Fagan proposed to pass. In reply I am to convey the following remarks of the Lieutenant Governor.

\*P.O. No. 54 *supra*.

2. The expiring assessment has been paid without difficulty, suspensions and remissions being unknown. During the 30 years that have elapsed since last settlement, it is calculated that prices have risen 35 per cent., but holdings are small, the tahsil is to a large extent shut off from outside markets, and it is only in exceptional years that any considerable surplus is available for export. Population has increased by 11 per cent., and the pressure on cultivation is high, averaging 88½ per square mile of cultivation in the whole tahsil and reaching 1,092 in the Pahar circle. The tract has an abundant rainfall, and the fact that 98 per cent. of the cultivation is unirrigated makes the cost of production much lower than where irrigation is more general. But the efficiency of agriculture appears to have risen considerably, as might be expected in a densely populated area with little margin for expansion of cultivation. The proportion of dofasli land shows a great increase, and after liberal deduction for failure, every 100 acres cultivated yield 115 acres of matured crops. Land is in great demand, except in the Pahar and Ghar circles, its value has increased enormously, and on the average throughout the tahsil it is worth well over 100 years' purchase of the revenue.

3. There is not room for very much difference of opinion as to the pitch of the new assessment. The Financial Commissioner's estimate of Rs. 5,76,000 for the true half assets is reasonable. There can, however, be no question of a large enhancement where the population is so dense, where there has been no expansion of cultivation to speak of since last settlement, and where there is no likelihood of future expansion. The Settlement Officer proposes a new demand of Rs. 3,20,961. The Commissioner would reduce this to Rs. 3,15,000 and the Financial Commissioner would raise it to Rs. 3,28,300. The Financial Commissioner's proposals involve an enhancement of 19 per cent. and his assessment would absorb 58 per cent. of the half net assets and about 14 per cent. of the gross value of the produce.

In four circles Mr. Fagan would take slightly less than the Settlement Officer proposes, and the Lieutenant-Governor approves of the Financial Commissioner's orders. In the Bet and the Dun Mr. Fagan proposes larger enhancements than Mr. Shuttleworth.

In the Bet the holdings are smaller than elsewhere, averaging less than 3¼ acres, and nearly half the total area is cultivated by the owners. Outside earnings are inconsiderable, and there has been a real decrease of cultivation owing to dilution for which, however, a corresponding reduction of revenue has been allowed. It is true that the rate on cultivation which the Financial Commissioner's proposals would give is almost exactly the same as in the Samrala Bet, but there the enhancement taken was only 7 per cent.; while here 23 per cent. is proposed. The Lieutenant-Governor thinks it will be sufficient to take Rs. 67,000 which will give an enhancement of 18 per cent. 67,000

In the Dun, it is true, holdings are larger, outside earnings are considerable, and two-fifths of the land is held by occupancy tenants, 50 per cent. of whom pay the revenue plus malikana. But His Honour observes that the assumed half net assets in this circle is nearly ¼ of the gross produce, and in view of the density of the population (967 per square mile of cultivation), he would not take an enhancement of more than one-sixth of the present demand,

2

Revenue (Revenue) Department, December 1913, Nos. 54-62.

or Rs. 1,48,000 in all. The Financial Commissioner may make any readjustments of rates in these two circles that may be necessary.

4. The result is as follows :—

Circle.	Present assessment.	Sanctioned.	Enhancement per cent.
	Rs.	Rs.	
Bet ... ..	56,647	67,000	18
Dun ... ..	1,25,412	1,43,000	17
Bet ... ..	13,813	17,000	23
Pahar ... ..	18,712	19,800	6
Ghar ... ..	44,408	51,000	15
Chaugar ... ..	16,105	19,500	21
	2,76,147	3,22,300	16.6

The new assessment will absorb 56 per cent. of the net assets and represent the value of about one-eighth of the agricultural produce.

5. The other orders which the Financial Commissioner proposes to pass are approved, and the new assessment may be brought into force from the present kharif.

6. The Lieutenant-Governor agrees with the Financial Commissioner that Mr. Shuttleworth has dealt with the complicated assessment problem of this tahsil in a lucid and masterly manner. His report is clear and interesting reading. Colonel Popham Young's review throws much light on the problem of assessment in this highly developed and almost stationary tract.
